

## CRUSHER PBK 60 / PBK 100

This crusher is intended to precrush bonewaste and whole carcasses. The machine has a revolving crusher roll provided with hardened crossknives which run towards interchangeable solids of steel. To guarantee a good output the tube of the crusher roll is provided with diagonal lifters. The crusher roll also has a feeding effect. The Palmia bone crusher has very

strong bearings with labyrinth seals to prevent leaking and to protect the bearings. The machine will crush the material so it is possible to transport it by pneumatic air system.

The driving occurs by double V-belt transmissions equipped with special narrow V-belts with great pull and long length of life.

### PBK 60

#### TECHNICAL DATA

Capacity: 10 t/h  
 Motor: 45 kW/60 HP  
 Transmission: V-belts  
 Net weight: 1800 kg  
 Shipping volume: 6,2–6,8 m<sup>3</sup>

### PBK 100

#### TECHNICAL DATA

Capacity: 20–30 t/h  
 Motor: 75 kW/100 HP  
 Transmission: V-belts  
 Net weight: 5300 kg  
 Shipping volume: 12,8–13,2 m<sup>3</sup>
